## » Tokyo Visitor's Guide

Tokyo, the capital of Japan, is one of the most interesting destinations for the international conferences. The city has a lot to offer. It has an unmatched variety

and quality of restaurants. There are many great international restaurants as well as traditional Japanese cuisine. Akihabara, approximately 15minutes by train from nearby station, is famous worldwide as the center for electric and electronic goods and is a leading area for multimedia. While you wonder in this district of technologies, you will also find the same place known for “sacred” place for otaku to get Japanese anime, comics, and idols, and visit the maid cafes. The town is becoming more and more attractive for Japanese pop culture fans every day. Ginza is a district known to be the first modern shopping area in Tokyo. The area boasts a plethora of department stores, top global designer brand shops and venerable Japanese shops on the main streets. In addition to shopping, this district is also home to theaters and more than 200 art galleries. Recently renovated Kabuki-za (Japanese traditional theater) is worth a visit even if you are not going to see a show. You can find traditional crafts and snacks in the Asakusa area. Just across the Sumida River stands the impressive Kaminari-mon Gate (Thunder Gate), with its large red lantern. If you travel a little more to Ryogoku area you may run into a Sumo wrestler. You can also find the tallest freestanding broadcasting tower in the world, “Sky Tree”, in this same area.
